# Office Action Summary

Application No.

10/091,797

Applicant(s)

FRUCHTMAN ET AL

Examiner

Gregory G. Todd

Art Unit

2157

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

- 1) ☒ Responsive to communication(s) filed on 04 May 2006.
- 2a) ☒ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## Disposition of Claims

- 4) ☒ Claim(s) 1-3, 5-7, 9-13, 15-17, 19 and 20 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1-3, 5-7, 9-13, 15-17, 19 and 20 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

## Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

## Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some \* c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
  - ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
  - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

## Attachment(s)

## **DETAILED ACTION**

### ***Response to Amendment***

1. This office action is in response to applicant's amendment and request for continued examination filed 25 October 2006, of application filed, with the above serial number, on 06 March 2002 in which claims 1, 9, 13, and 19 have been amended and claims 8 and 18 have been cancelled. Claims 1-3, 5-7, 9-13, 15-17, and 19-20 are therefore pending in the application.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-6, 9-16, and 19-20 are rejected under 35 U.S.C. 102(e) as being anticipated by Dunham et al (hereinafter "Dunham", 6,714,952).

As to claim 1, Dunham teaches a method of restoring data in a computer network system wherein a plurality of client systems have access to a storage pool coupled to an associated storage area network (SAN) (at least col. 3 line 66 - col. 4 line 11) comprising the steps of:

Art Unit: 2157

requesting a restore wherein each of said plurality of client systems may participate in said restore (at least col. 10, lines 11-27; receiving request for data to be restored); and

coordinating restoration of data stored in said storage pool using a storage management server that constructs a master restore table comprising a plurality of data portions to be restored and an associated location of said plurality of data portions in said storage pool (at least col. 4, lines 1-11; col. 5 line 26- col. 6 line 34; catalogue having information on data stored in backup storage devices and backup/restore server) wherein said master restore table is identified by an associated token and a client system participating in a restore gains access to said master restore table by use of said token (at least col. 5 line 63 - col. 6 line 11), tracks said plurality of data portions of said data as restored by said plurality of client systems, and blocks access to each of said plurality of data portions that have been restored by one of said plurality of client systems to avoid duplicative restoration efforts (at least col. 10, lines 11-59; col. 5, lines 63-67; determining appropriate data to be restored according to system/ metadata/ catalogue, and cleaning up/ de-allocation).

As per Claim 2, wherein said coordinating access step occurs during a plurality of sessions (at least col. 8, lines 10-33; eg. file-by-file basis).

As per Claim 3, wherein said coordinating access step is interruptible (at least col. 8, lines 10-33; col. 5, lines 35-42; eg. file-by-file basis/ scheduler).

As per Claim 5, wherein said storage pool comprises a plurality of storage devices and said associated location of said data portions includes a location in one of said storage devices (at least col. 4, lines 1-11; Fig. 1).

As per Claim 6, wherein said data portions are provided concurrently from said plurality of storage devices to a target restoration device (at least Fig. 1; col. 4, lines 1-11; eg. central backup/restore server through which all data goes).

As per Claim 9, deleting master restore table after restoration of a target restoration device is complete (at least col. 10, lines 55-59).

As per Claim 10, wherein said constructing step further comprises automatically partitioning said plurality of data portions in said master restore table based on said associated location of said plurality of data portions in said storage pool (at least col. 4, lines 1-64; col. 5 line 35 - col. 6 line 34).

As per Claim 11, wherein said coordinating access step occurs before said master restore table is fully constructed (at least col. 4, lines 1-64; col. 5 line 35 - col. 6 line 34).

As per Claim 12. The method of claim 4, wherein said master restore table is saved in a storage management server, said storage management server coupled to said SAN (at least col. 3 line 66 - col. 4 line 11).

Claims 13, 15-16 and 19-20 do not add or define any additional limitations over claims 1-3, 5-6 and 9-12 and therefore are rejected for similar reasons.

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 7 and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Dunham et al (hereinafter "Dunham", 6,714,952) in view of Derek Gamradt, "Backup without disruption: LAN-free, server-free SAN backup avoids disrupting business", (hereinafter "Gamradt").

Dunham doesn't explicitly teach "a LAN-free path or a server-free path". However, Gamradt teaches LAN-free, server-free SAN backup avoids disrupting business. Gamradt does teach data representative of a LAN-free path or a server-free path from a client to a storage pool (pages 1-5). It would have been obvious for one of ordinary skill in the art at the time of the invention was made to modify Dunham by having master restore table comprising data representative of a LAN-free path or a server-free path from a client to storage pool since doing so would allow data transferring between a client and storage pool without hindering LAN performance and without affecting standard network operations, as Gamradt teaches improving overall LAN performance, reducing administration costs, and enhancing the storage processes.

### ***Response to Arguments***

6. Applicant's arguments filed 04 May 2006 have been fully considered but they are not persuasive. Applicants argue, in substance, that Dunham fails to teach a master restore table being identified by an associated token and a client system participating in a restore gains access to said master restore table by use of said token.

However, Dunham clearly teaches the limitation as Dunham teaches a catalogue containing a description of various files as well as associated attributes and metadata for each of the various files (at least col. 5 line 63 - col. 6 line 11). Dunham goes on to explicitly state "Metadata or file attributes may include, for example, how the file may be accessed by various users...", and thus the metadata for the files to be accessed, restored or backed up, can be based on the user (client system) access rights for the file in the catalogue for restoration purposes, and thus Dunham teaches the limitations of the claims as amended.

### ***Conclusion***

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Newly cited Korn (col. 8 line 65 – col. 9 line 25; token usage) and Hsiao et al, in addition to previously cited Cane et al, Sutton et al, Arakawa et al, Gill et al, Fletcher et al, Yao et al, and Kopper are cited for disclosing pertinent information related to the claimed invention. Applicants are requested to consider the prior art reference for relevant teachings when responding to this office action.
